## Type of lice selector

(/v1/geodata/fishhealth/locality/{localityId}/ {year}/{week})

52 weeks of lice counts

Plot a line giving a threshold  
for maximum allowed lice count.  
Invent a threshold you like.

Alarm!!!! When anything is above!  
Some graphical sign, e.g., saying stop

## Weather type

(/v1/geodata/fishhealth/locality/{localityId}/ {year}/{week})

52 weeks of weather

Need to give a message  
when data are not available

## Weather

ARIMA model predicting  
chosen lice type with  
weather as exogeneous  
data.

Show result table:  
- coefficients  
- P-values

Bonus plot, for those that  
want to: One-step-ahead  
prediction plot

Short description of how things are connected behind the scenes.
